

FROILAN DE LEON OCUBILLO

Brgy. Dayap, Calauan, Laguna | 0970-152-0052 | ocubillofroilan@gmail.com
linkedin.com/in/froilan-ocubillo-834609409 | github.com/ocubillofroilan-dev

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript	Networking: TCP/IP & OSI Model, IP Addressing,
Backend: Python, Flask, Django	Cabling, DHCP, Network Topology, IPv4/IPv6, Active
Database: MySQL, PostgreSQL	Directory.
Versioning: Git, Git Bash, GitHub	Others: VS Code, AutoCAD, Arduino IDE, Java, C++

PROJECTS

Arduino-Based PET Bottle Filament Maker for 3D Printing <i>Arduino Uno, Arduino IDE (C++), Sensors, Motors, LCD Display, Hotend, AutoCAD</i> Multipurpose device for Brgy. Dayap, Calauan, Laguna that converts PET bottles into 3D printing filament in a single device, from cleaning and stripping through hotend extrusion. - Led the project group and managed documentation throughout development. - Programmed system logic in C++ with AI assistance, designed mechanical components in AutoCAD, and handled wiring and cabling for hardware integration.	<i>Thesis</i>
Job Finder Application <i>HTML, CSS, PHP, MySQL, XAMPP</i> Web application for San Pablo, Laguna focused on job searching for employees and job posting for employers; presented to faculty (not published). - Led the project group and managed documentation throughout development. - Designed the website layout in Canva, built the site using HTML/CSS with AI assistance, and contributed to the MySQL database.	<i>Project</i>
Authenticated Notes <i>HTML, CSS, JavaScript, Python, Flask, SQLAlchemy</i> Solo-built note-taking web app with secure user authentication and CRUD functionality, using Flask for routing/session handling and SQLAlchemy as storage. Designed the database schema and implemented user-scoped access so each account only sees its own notes.	<i>Independent Project</i>
Customer Relationship Management System <i>HTML, CSS, JavaScript, Python, Django, MySQL</i> Solo-built CRM web app for managing client records, with authentication and CRUD functionality built on Django and MySQL backend. Structured the data models for client information and built the create/update/delete workflows end-to-end.	<i>Independent Project</i>

WORK EXPERIENCE

Healthcare Customer Service Representative <i>Nextvas, Los Baños, Laguna</i> - Recognized as Top Agent and Top QA Performer in separate months, reflecting excellence in both output volume and communication accuracy. - Handled inbound and outbound customer communications via email and SMS/text, supporting multiple teams as needed with flexibility and effective cross-workflow collaboration. - Built automated templates using Python (PyCharm, Notepad++) and developed an Excel-based tool integrated with the main ticket submission system, eliminating the need to fill out 2–3 pages of forms to submit a single ticket.	<i>Nov 2024 – Feb 2026</i>
Engineering Department Intern <i>Furukawa Automotive Systems LIMA Phils., Inc., Lipa City, Batangas</i> - Assisted engineering and maintenance teams in improving production boards to reduce defects and increase operational efficiency; supported documentation, task tracking, and staff activity monitoring. - Redesigned the frontend of the maintenance department's software application (checkboxes, dropdowns, color-coded issue levels), streamlining the logging of production line concerns and resolutions; presented the redesign to the IT department, achieving a 90% approval rate.	<i>Jun 2023 – Sep 2023</i>
Store Staff & Cashier <i>Telay Store 888, Masapang, Laguna</i> - Handled cashier duties during peak hours, ensuring accurate transactions and efficient service. - Managed packing of purchased items, processed customer orders, and organized product displays.	<i>Nov 2021 – Jun 2023</i>

EDUCATION

Bachelor of Science in Computer Engineering <i>Pamantasan ng Lungsod ng San Pablo</i>	<i>Graduated July 12, 2024</i>
